## Home Theater System

The Latest and Best from both NAD and B&W. From **HI-FI Choice Magazine Review**: "We would be very impressed if any other companies could compete with the bandwidth and resolution on offer from the 683, which is a remarkably revealing speaker for its price. You can clearly hear right into the mix, the fine details that are often masked being easily picked out. This applied equally to differences between voices in a choir and to the little extras that accompany the vocal in a densely mixed piece of hip-hop. This is partly because of the speaker's wide dynamic range, its sensitivity to the smallest notes even when there are far louder ones threatening to hide them." The matching HTM-61 center channel offers the same outstanding performance as the 683's, enabling you enjoy all the fine soft detail you miss in other brands. The B&W DM-686's are the perfect match for the rear effect speakers. In the B&W 610 subwoofer, the bass driver diaphragm is constructed from a rugged, finely-tuned mix of paper pulp, Kevlar® fibers and resin, which provides the stiffness needed to withstand the tremendous physical forces exerted by the voice coil and pressures inside the cabinet.

NAD T-765HD2 - \$2499 - A/V Receiver

*Ask for full system literature*

The NAD high definition T 765 HD2 now comes with full 3D Video and HDMI 1.4a thanks to NAD's innovative approach to upgrading your AV tuner preamplifier – Modular Design Construction (MDC). The NAD T 765 HD2 is heir to many generations of award-winning NAD designs. This exceptional pedigree is evident in both the look and the feel of the T 765 HD2, and it is unmistakable the moment you listen. It is NAD's insistence on creating products with remarkable sound quality at sensible prices that has made NAD the first choice among the most knowledgeable listeners from around the world. NAD's 'Music First' philosophy dictates that we endow our Audio Video products with the same warm, involving sound quality that makes music listening so rewarding with our stereo components. This stands in stark contrast to our competitors who view Audio Video components primarily from a 'content' point-of-view, with sound quality far down the list of priorities. Yet the T 765 HD2 is second to none in terms of flexibility and up-to-the-minute digital technology.

**FREE** In-Home Consultation if you would like our advice and / or recommendations. We will also give you a bid for the wiring and installing your NEW system. Call or stop in and we'll set up an appointment to do so.

## *Warranties*

**NAD T-765HD2** – two years parts & labor

**B&W** speakers – five year parts & labor

**B&W sub** – 5 years parts and labor on the speaker and 3 years parts and labor on the amplifier
